

9 Oct 2025 | 📅 Sprint 04 Meeting

Attendees: Zaneerah Essop Ammaarah Cassim Tariro Muvevi
Raeesa Lorgat Karabo Bopape Imaan Saloojee

Sprint 04 Meeting 2

Start Time: 19:00
End Time: 20:30
Venue: Google Meet

This how the team decided to split the deliverables for this last sprint

- Testing: Karabo and Raeesa
- Methodology and planning: Tariro
- Deployment and Integration: Zaneerah
- Architecture : Imaan and Ammaarah
- Introduction and general discussion: Imaan
- Deadline and meeting for the group report: Thursday, 16 October
- Deadline for bugs : Friday, 17 October

Notes

- All the bugs that we have all gathered have been added to a shared google document and if there are any more bugs discovered, they should be added to the document accordingly.
- We are awaiting on our tutor to share a guideline we can use to guide us as we complete the report.
- We need to schedule a meeting with our tutor, Thendo, to give him a mock presentation before the action presentation day.

Zaneerah Essop (Presenting)

SPRINT 3 RUBRIC

Criteria	Weight	Description
Availability (accessibility)	3%	Is your API available for external and internal usage?
Architecture (are you following a consistent way)	5%	How well your API follows an established API architecture and all of its principles
Deployment	2%	API is deployed
Performance	5%	How well does your API handle significant loads, how often does it crash, and how well does it handle incorrectly formatted requests etc.
Design	10%	Does your API make use of the different HTTP methods correctly? Do you have redundant endpoints? Does the organization & hierarchy make sense to an external user?

API's can use an external API if we can't get into the group API

API's compromise packages, are it the things are safe
4. notes and API audits, documents not things to document in security matter.
4. notes and API audits, documents not things to document in security matter.
If we succeed, manage old version (locking down a version)
warn, warning tags
→ code tags

AUDITS
→ check + check check, package, team
→ get compromise team
if compromise, do audit use... resources etc, right something
Sprint 3: a couple

CONSIDER: ratio, colour, colourblind friendly

Auto

Criteria	Weight	Description
Accessibility	5%	Is your product accessible? (Google Ratio's, use of semantic HTML, ARIA tags)
Aesthetics	3%	Does your product look good? Does it have consistent styling?
User Experience	5%	How do you handle errors? How long does it take a user to use some feature? Can the user re-open a closed tab and continue where they left off or do they need to re-login?
Deployment	2%	Web-App is deployed
Performance	5%	How long does it take to load? How responsive is the program to input?
Features	10%	How well implemented are your features?
